--- Tour the Stem Cell Research Center ---

Get a behind the scenes peek at the cutting-edge science and discoveries being made at UC Irvine that are giving millions of people hope worldwide who are suffering from illness and diseases for which there are no effective therapies.

See first-hand how our talented scientists are changing the way medicine is practiced as they push the boundaries of what is possible in the exciting new science of regenerative medicine.

--- Featured Speakers ---

Ping Wang, MD  
Professor, School of Medicine, Biological Chemistry—Sue & Bill Gross Stem Cell Research Center Member

Maksim Plikus, PhD  
Assistant Professor, Department Developmental and Cell Biology —Sue & Bill Gross Stem Cell Research Center Member

Professor Wang will discuss methods to prevent, treat, and eventually cure diabetes and its complications.

Professor Plikus will discuss how complex tissues and organs regenerate under normal conditions and in response to injury or disease.

Our next tour

Thursday, January 18, 2018  
3:00-4:30 pm

RSVP required—Space is limited.

Call or email Amber Harness to RSVP.  
949-824-9021  
aharness@uci.edu

Registration can also be completed online at stemcell.uci.edu

Sue & Bill Gross Hall  
845 Health Sciences Road,  
Irvine, CA 92617

Note: One parking pass per household will be provided. Please indicate when registering if you will need a pass. Driving and parking directions will be emailed 1-week prior to the tour.
