2020-2021 Virtual Community Lecture Series

Join our physician scientists and basic science researchers as they provide an invaluable opportunity to learn more about stem cells, including current research, clinical trials, therapies, and the future of regenerative medicine.

Lectures are FREE and open to the public.

COVID-19 Panel, Part 2
Tuesday, Sep. 1, 2020, 7 p.m.
Special Virtual Event
Ming Tan, MD
Ed Monuki, MD, PhD
Dan Cooper, MD
Daniela Bota, MD, PhD

Celebrating 10 Years
Oct. 12-16, 2020
Stem Cell Awareness Week

COVID-19 Panel, Part 3
Tuesday, Feb. 23, 2021, 7 p.m.
Special Virtual Event
Ming Tan, MD
Shruti Gohil, MD
Weian Zhao, PhD
Daniela Bota, MD, PhD

Biomaterials for Personalized Medicine
Tuesday, Mar. 9, 2021, 7 p.m.
Combining Engineering with Stem Cells
Herdeline Ardoña, PhD
Quinton Smith, PhD

Stem Cell Insights into Epilepsy
Tuesday, Apr. 6, 2021, 7 p.m.
Seizures in a Petri Dish
Diane O’Dowd, PhD
Jack Lin, MD

Special Presentation
Tuesday, Apr. 20, 2021, 5:30 p.m.
Towards a Stem Cell-Based Treatment for Parkinson’s Disease - Where do we stand?
Lorenz Studer, PhD

Muscle Wasting and Repair
Tuesday, May 4, 2021, 7 p.m.
Treating Inflammatory Muscle Disease
Michael Hicks, PhD
Tahseen Mozaffar, MD

The Human Breast Cell Atlas
Tuesday, Jun. 8, 2021, 7 p.m.
Curing Breast Cancer One Cell at a Time
Devon Lawson, PhD
Kai Kessenbrock, PhD

Brain Organoids
Tuesday, Sep. 7, 2021, 7 p.m.
Lab-Grown Brains: New Models to Study Neurological Disorders
Momoko Watanabe, PhD Claire Henchcliffe, MD, DPhil

Lectures will be held virtually. To register go to:
