

# ARE YOU RECOVERING FROM A STROKE?

YOU MAY BE ELIGIBLE TO TAKE PART IN A RESEARCH STUDY.

Call **1-844-707-8336** to speak with a **PISCES III** team member or visit **WWW.PISCES3.ORG** to see if you pre-qualify.

PISCES III is a clinical research study to determine whether stem cells injected into a damaged area of the brain can improve arm and/or leg movement in people with ongoing disability after an ischemic stroke (a stroke that occurs when blood flow to the brain is blocked, such as by a clot).

**WWW.PISCES3.ORG**

## WHAT ARE STEM CELLS?

Stem cells are cells early in the tissue development pathway that have the potential to develop into more specialized cells such as nerve cells. In many tissues they act as an internal repair system.

PHASE IIb  
INVESTIGATION  
OF STEM CELLS  
IN STROKE

## HOW DO I KNOW IF I AM ELIGIBLE?

You may be eligible to participate if you:

- Had an ischemic stroke 4 to 11 months ago that has resulted in limited movement of your arms and/or legs.
- Are between 35 and 75 years of age.
- Are willing to undergo a single surgical procedure and attend pre-surgery and post-surgery visits.
- Are able to perform physical therapy exercises daily at home for 12 weeks and attend follow-up visits at the study site every couple of months for approximately one year.

**TO COMPLETE AN ELIGIBILITY QUESTIONNAIRE, VISIT [WWW.PISCES3.ORG](http://WWW.PISCES3.ORG) OR CALL: 1-844-707-8336**

If you decide to participate, you will be an important part of the research team and have a vital role in advancing medical knowledge and understanding of stroke therapy.

## HOW DO I TAKE PART IN THE STUDY?

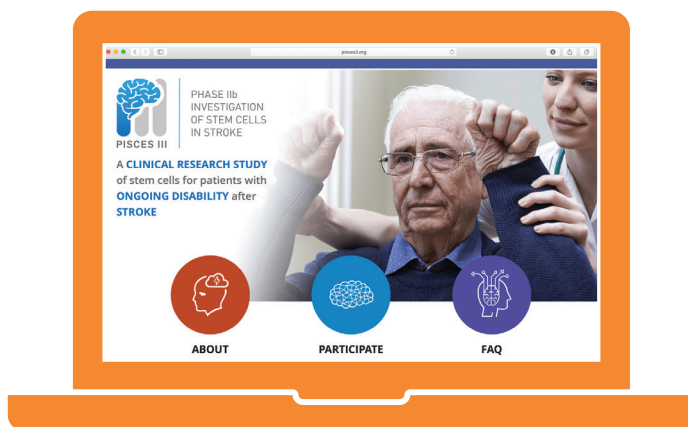

- Go to [WWW.PISCES3.ORG](http://WWW.PISCES3.ORG) on your computer or smartphone.
- Call 1-844-707-8336 to speak with a PISCES III team member.
- Talk with your doctor about your interest and potential eligibility.

## WHO IS FUNDING THIS STUDY?

Funding for PISCES III comes from ReNeuron, a leading stem-cell therapy development company based in the United Kingdom and in the U.S. ReNeuron's primary objective is the development of novel stem-cell therapies targeting areas of significant unmet medical need.
